Over the next year, city staff will begin the second phase of the project and host a series of meetings to work with you to develop designs for the streets in the **Huron B** neighborhood. The design process for the Huron A neighborhood has concluded. *It is critical that we hear from you* about what works in your neighborhood, what could be improved, and how you would like your streets to be reconstructed, as we have an opportunity to include:

- Curb Extensions
- Changes to On-street Parking
- Raised Crosswalks
- Additional Bike Facilities

- Rain Gardens
- Chicanes (alternating parking)
- Widened Sidewalks

We encourage you to attend the meeting on May I to learn more about the design options, share your thoughts about your street and participate in the design process. The next round of Huron B meetings will take place in June. Please stay tuned for details.
